ad VIII 6; 197 Satur u y Nav. gentlemen? a yesterday reviewed with the liveliest satisfaction the two remains ming quarters of your datorate and hometiful map of the moon's surface together with the treatise accom, panying them as also your maps of the surface of Mars. Tray woods my best shanks for this esteemed and valuable process, and at the same time my hourty congratulation on the confection of a work of with very great labour and difficulty as well as importance. The want of such maps now way been felt and regretted. Had the Missionanies to whom they were intrusted arrived two months later; we should have quitted the Cape ! I expect to arrive in England some I time in May and it is not impossible that during the Jummer I may have the pleasure to thank you in person for this mark of your attention, as I propose visiting Hanover soon after my arrival in England, and if Aime will promist should be very destrous to come as for as Section - it is were willy for the rate of wine my respects to your closs and your ad mirable lacke? When last I whom to you on the receipt of your former maps, I spoke with heritation a con the 6th (20) caselliste of Estevent since that him fin May last) have how the sariefaction of coursely it seared times is a most anyuivocal numer, and fracing is through deweral revolutions in its orbiv. Box the ofth 10 leter, bid all my mearch. The great dietractor preparing for the Tetershing Observatory with however, I hope show it? I have also procured a fine vories of miero medical measures of all the other sutellises in every disuation with respect to the primary - the ownest and smallest of them being easily observed at is superior are interior conjunctions, take measures are repeared as once to the rings major axis by a peculiar mode of Abservation which poor such very good and accorn ing results their only regret no having his ) with the fore the stand of allowers from I made out the factor of many of the later than the stand of the sta

A in (1) are sevo way thick parallel wires, distant enough. to rake in easily between them the planet and Ring, I measure re the approach alonguion or the angle of a fatellite & from the line of channe or the angle and a , the planet in livel place between the wires so as in (fig I) to stand symme is erically of which the ye will find with leatherne procession the granteded imision being her off, They are head placed as in fig 2. and it is suggested by how very correctly with a little prairie this may be done so that the line I've shall be parallel to the direction of the wires. This being done with. nasty 0,5 or frines (so as to leave off with the position No 1.) - all carge of sixuation with respect to the horizon to is Mininated. is one of my good inclused. The Star of Argus ( marked in Bole : Man is y hoter bardif has deverys Shither to been projected as a star of the second magnitude or at need as (21) July the come years I have had fix is in were) continually and my eye, by reason of the great notates which where been to king which I have always considered it ar (2.1) and never had reason to suppose in variable. In Nav 1637 . and is as well , Juige of my surprise to fine on the 16.14. ( -icomoer that it was suiderly become a star ax the first may, while and amost equal to high . It continued to increase. thigh is now in so a conquere soit, it excells exchance, in is my ronly qual to & Balauri , wing at the menter when I write, in south sain the heavens in over of his forego! achen I work, year to me, your obliged and faithful I want & . I for will ablige me by communicating the above mondio in fact requesting of Argus to Orof Schusnacher, as perhaps he my think is worth nothing in the Nation Nachranten to In the total wiper of the moon last year was linely seen here ! The whole list was well seen with the nache eye; interesty and like a glowing cost all the spots will ich is to y becope many occurrences bear place of very minute stars and a faint whaten was fraced up almost to the very cong. of the disa . It would have been interesting under 16 town Time vegler of stops and the ". Neen a mebula occulted.
